

# CMX Snow Climatology - May

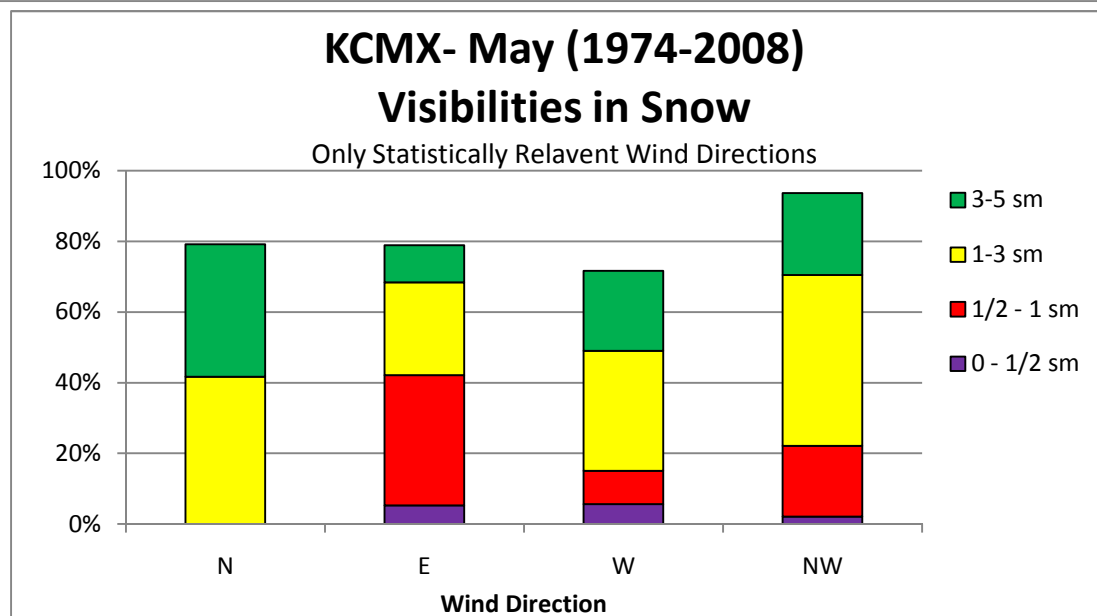

Majority of observations with snow occurred with N, E, W, and NW winds.

The most observations with snow occurred with NW winds.

## ***Ceilings:***

With NW winds, majority of ceilings were IFR (500 - 1000 ft).

## ***Visibilities:***

Majority of visibilities IFR (1 - 3 miles) except VLIFR and LIFR (less than 1 mile) with E winds.

## KCMX- Hourly Observations with Snow May (1974-2008)
